

CG-050-M

The CG-050M is a portable, skid mounted, hand operated grout pump. The lightweight aluminum design makes this pump perfect for smaller jobs.

Features

- Excellent for many applications including marine and underwater projects, door frames, window frames, hollow metal filling, precast, machine base, under sealing, slab raising, and encasements.
- The holding hopper connected directly to the suction of the pump for a continuous pumping operation.
- System disassembles without tools for fast and efficient cleaning.
- All components are easily accessible for operation and maintenance of the pump.
- Rental pumps are available.

Components

- 5.08 cm positive displacement manually powered pulsating piston pump
- 20 L holding hopper
- Dimensions: 111.76 cm x 27.94 cm x 78.74 cm
- Weight: 23.58 kg

Specifications

Maximum Output	8 - 12 L/min
Maximum Pressure	200 PSI
